SUBJECT INDEX

- Acquisition and processing of surface electro-myographic signals, optimizing the, 100
- Aids, external, biomedical engineering - priorities for research in, 325
- Anaesthetic information, codifications of, for computer processing, 196
- Aneurysm, arterial, pulsatile pressure and flow in, simulated in a mathematical model, 153
- Angiograms, determination of coronary artery diameter and contrast medium concentration from, 57
- Arterial aneurysm, pulsatile pressure and flow in, simulated in a mathematical model, 153
- Arterial stenoses, pulsatile pressure and flow in, simulated in a mathematical model, 17
- Artery diameter, coronary, determination of, and contrast medium concentration from angiograms, 57
- Assessment of a car conversion to ease access for wheelchair users, 315
- Automatic detection of the upstroke on peripheral pulse waveforms, 65
- Basic principles of electrohaemodynamics, 25
- Bio-compatibility tests, the effects of mechanical factors on, 209
- Biomechanical assessment of patients treated by joint surgery, 297
- Biomedical engineering - priorities for research in external aids, 325
- Blissymbols *see*: Multi-language
- Blood flow investigations, doppler ultrasound, reduction of operator fatigue in, 140
- Carbon fibre reinforced plastic applied to prosthetics and orthotics, 305
- Car conversion, assessment of a, to ease access for wheelchair users, 315
- Cardiac dimensions and intramural deformations, method for measuring, 49
- Ceramic, porous, twin-flap mitral valve prosthesis, development of a, 3
- Chairbound disabled person, seating for the, a survey of seating equipment in the United Kingdom, 267
- Codifications of anaesthetic information for computer processing, 196

- Comparison of methods for obtaining a heart rate variability signal from 60 x real time ECG data, 239
- Compression — reconstruction of ECG signals, a method for, 214
- Computed tomogram data, digitization of, from a radiotherapy simulator, 217
- Computer *see*: Minicomputer
